

Engineering Insurance

For Equipment and Construction Needs

Protect your equipment and the construction works of your business. We have a range of insurance solutions that provide coverage for the many assets of the business or company. We also have solutions that provide protection for on-going construction and other civil works.

Construction All Risk Insurance

Ensures construction projects such as buildings, roads, bridges, and other civil engineering projects against accidents resulting in loss or damage of works in progress, materials, construction equipment and machinery during the period of construction. Covers the cost of the completed portion inclusive of the cost of materials on site, wages, freight, and customs duties. May also include third party liabilities arising from construction activities. This may also be extended to cover the period of testing.

Equipment All Risk Insurance

Insurance against accidents resulting in damage or destruction to machinery, mechanical equipment and apparatus during the course of erection or installation. EAR may be used to cover the erection or installation of individual machinery or for the erection of complete factories or industrial plants. May also include third party liabilities arising out of the erection activities.

Electronic Equipment Insurance

This is an all risks cover appropriate for accidents involving electronic equipment such as electronic data processing equipment (computers), medical equipment such as ECG machines, X-ray and other equipment used in hospitals and laboratories; communication facilities such as telephone exchanges, radio, television and communication apparatus, and other miscellaneous equipment. This policy may cover not only the loss of or damage to the electronic equipment but may also extend to cover the material value of the external data media and the cost of reprocessing lost information as well as the additional expenses incurred as a result of the breakdown of the electronic equipment.
